CAUTIONARY NOTE REGARDING FORWARD-LOOKING INFORMATION AND NON-IFRS MEASURES

Except for the statements of historical fact contained herein, the information presented constitutes “forward-looking statements”, within the meaning of the U.S. Securities Act of 1933, the U.S. Securities Exchange Act of 1934, the Private Securities Litigation Reform Act of 1995 and applicable Canadian securities legislation, concerning the business, operations and financial performance and condition of Sandstorm Gold Ltd. (“Sandstorm”). Forward-looking statements include, but are not limited to, the impact of general business and economic conditions; the expectations regarding the growth potential of Sandstorm including in scale and production and the anticipated benefits of the Transactions; management’s expectations regarding Sandstorm’s growth; the future price of gold, silver, copper, iron ore and other metals, the estimation of mineral reserves and resources, realization of mineral reserve estimates, the timing and amount of estimated future production, the offer and sale of Common Shares under the at-the-market equity program (the “ATM Program”), including the timing and amounts thereof, the use of any proceeds from the ATM Program, and statements with respect to the Company’s normal course issuer bid (“NCIB”) and the number of Common Shares that may be purchased under the NCIB.

Forward-looking statements are made based upon certain assumptions and other important factors that, if untrue, could cause the actual results, performances or achievements of Sandstorm to be materially different from future results, performances or achievements expressed or implied by such statements. Such statements and information are based on numerous assumptions regarding present and future business strategies and the environment in which Sandstorm will operate in the future, including the price of gold and anticipated costs. Certain important factors that could cause actual results, performances or achievements to differ materially from those in the forward-looking statements include, amongst others, gold and other commodity price volatility, discrepancies between actual and estimated production, mineral reserves and resources and metallurgical recoveries, mining operational and development risks relating to the parties which produce the gold Sandstorm will purchase, regulatory restrictions, activities by governmental authorities (including changes in taxation), currency fluctuations, the global economic climate, dilution, share price volatility and competition.

Forward-looking statements are subject to known and unknown risks, uncertainties and other important factors that may cause the actual results, level of activity, performance or achievements of Sandstorm to be materially different from those expressed or implied by such forward-looking statements, including but not limited to: the impact of general business and economic conditions, the absence of control over mining operations from which Sandstorm will purchase gold, other commodities or receive royalties from, and risks related to those mining operations, including risks related to international operations, changes in business plans and strategies, market conditions, share price, best use of available cash, government and environmental regulation, actual results of current exploration activities, conclusions of economic evaluations and changes in project parameters as plans continue to be refined, risks in the marketability of minerals, fluctuations in the price of gold and other commodities, fluctuation in foreign exchange rates and interest rates, stock market volatility, as well as those factors discussed in the section entitled “Risks to Sandstorm” in Sandstorm’s annual report for the financial year ended December 31, 2023 and the Company’s annual information form dated March 23, 2023 available at www.sedarplus.ca. Although Sandstorm has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. Sandstorm does not undertake to update any forward looking statements that are contained or incorporated by reference, except in accordance with applicable securities laws.

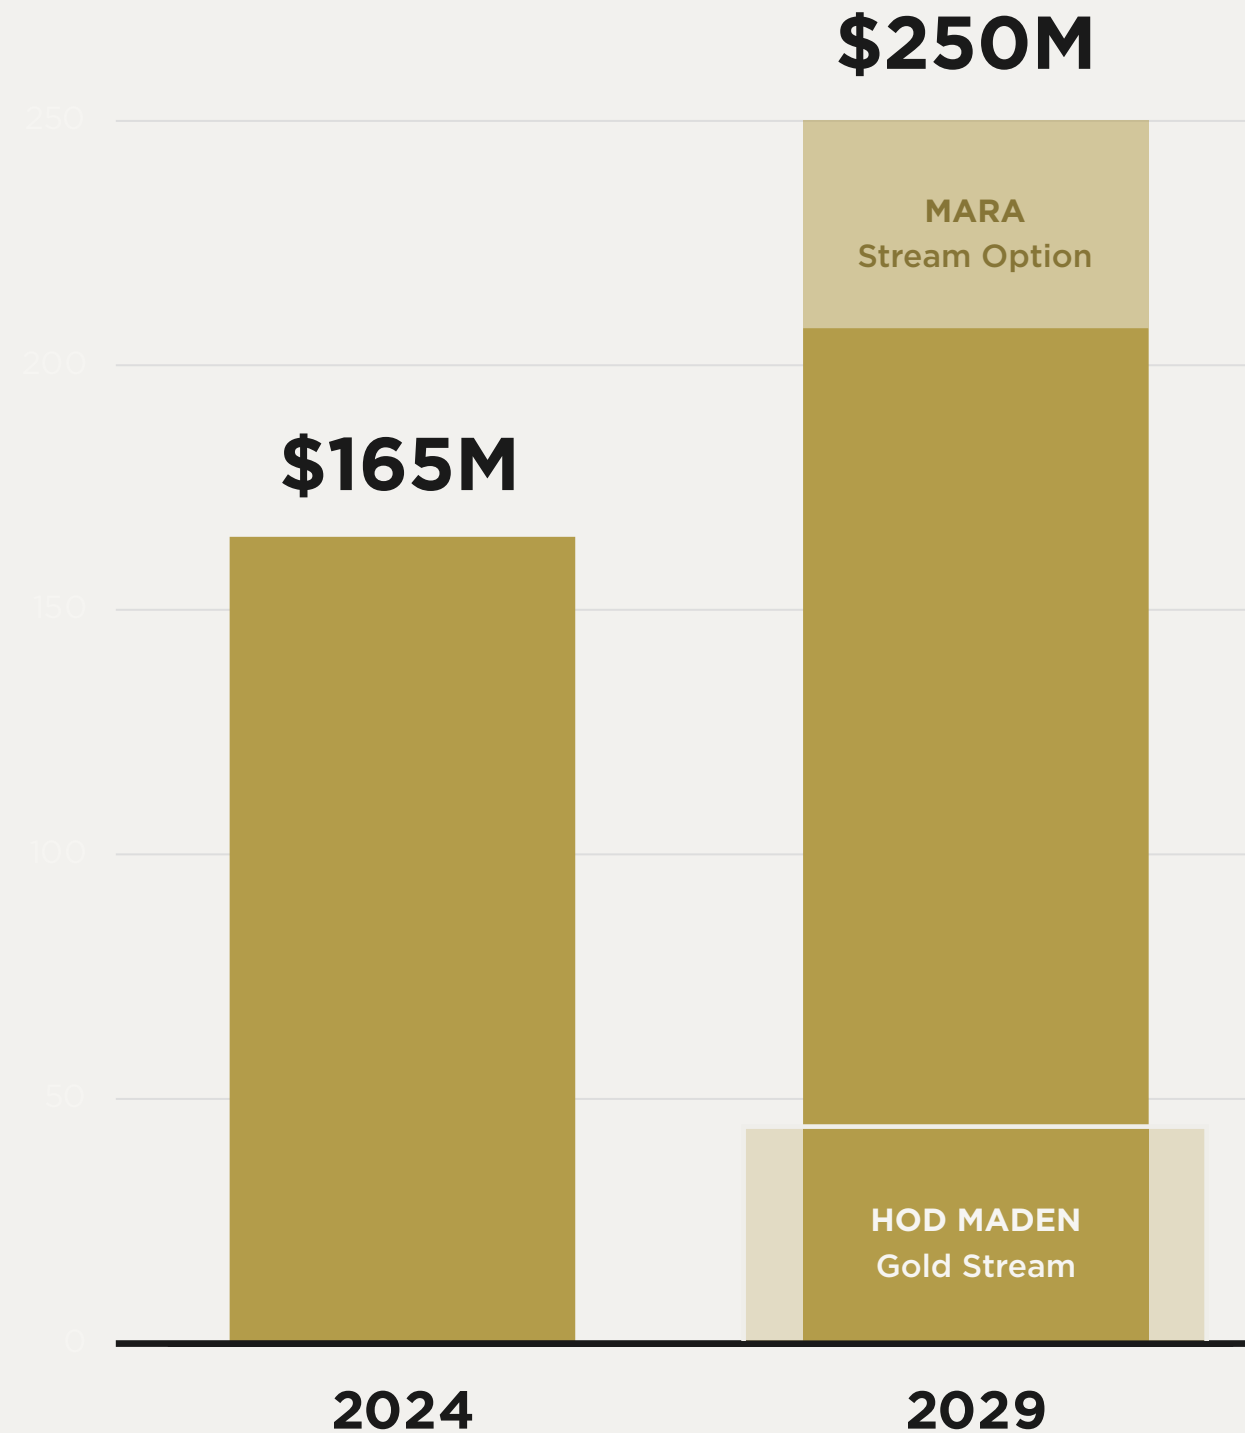

Sandstorm has included certain performance measures in this press release that do not have any standardized meaning prescribed by International Financial Reporting Standards Accounting Standards as issued by the International Accounting Standards Board (“IFRS Accounting Standards” or “IFRS”) including, (i) total sales, royalties, and income from other interests, (ii) attributable gold equivalent ounce, (iii) average cash cost per attributable gold equivalent ounce, (iv) cash operating margin, and (v) cash flows from operating activities excluding changes in non-cash working capital. Total sales, royalties and income from other interests is a non-IFRS financial measure and is calculated by taking total revenue which includes sales and royalty revenue, and adding contractual income relating to royalties, streams and other interests excluding gains and losses on dispositions. The Company presents Total Sales, Royalties and Income from other interests as it believes that certain investors use this information to evaluate the Company’s performance and ability to generate cash flow in comparison to other streaming and royalty companies in the precious metals mining industry. Attributable gold equivalent ounce is a non-IFRS financial ratio that uses total sales, royalties, and income from other interests as a component. Attributable gold equivalent ounce is calculated by dividing the Company’s total sales, royalties, and income from other interests, less revenue attributable to non-controlling shareholders for the period, by the average realized gold price per ounce from the Company’s gold streams for the same respective period. The Company presents Attributable Gold Equivalent ounce as it believes that certain investors use this information to evaluate the Company’s performance in comparison to other streaming and royalty companies in the precious metals mining industry that present results on a similar basis. Average cash cost per attributable gold equivalent ounce is calculated by dividing the Company’s cost of sales, excluding depletion by the number of attributable gold equivalent ounces. The Company presents average cash cost per Attributable Gold Equivalent ounce as it believes that certain investors use this information to evaluate the Company’s performance and ability to generate cash flow in comparison to other streaming and royalty companies in the precious metals mining industry who present results on a similar basis. Cash operating margin is calculated by subtracting the average cash cost per attributable gold equivalent ounce from the average realized gold price per ounce from the Company’s gold streams. The Company presents cash operating margin as it believes that certain investors use this information to evaluate the Company’s performance and ability to generate cash flow in comparison to other streaming and royalty companies in the precious metals mining industry that present results on a similar basis. Cash flows from operating activities excluding changes in non-cash working capital is a non-IFRS financial measure that is calculated by adding back the decrease or subtracting the increase in changes in non-cash working capital to or from cash provided by (used in) operating activities. The Company presents cash flows from operating activities excluding changes in non-cash working capital as it believes that certain investors use this information to evaluate the Company’s performance in comparison to other streaming and royalty companies in the precious metals mining industry that present results on a similar basis. Refer to pages 34-36 of the Company’s MD&A for the year ended December 31, 2023, which is available on SEDAR+ at www.sedarplus.ca, for a numerical reconciliation of the non-IFRS financial measures described above. The presentation of these non-IFRS financial measures is intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. Other companies may calculate these non-IFRS financial measures differently.

Corporate Update

PORTFOLIO CASH FLOWS¹

In US\$ Millions

Built in Cash Flow Growth

Gold	Silver	Copper
\$2,300/oz	\$27/oz	\$5.00/lb

1. Cash flows from operating activities attributable to the Company's operating segments excluding changes in working capital and corporate G&A. MARA Stream Option is based on cash flows from expected attributable production, and is subject to conversion decision and contractual payment.

DEBT OBLIGATIONS

Debt is Evaporating

Share Buybacks Now

\$315M in Debt and Equity Investments¹
