Royalty Ounces

Sandstorm Gold Royalties (“Sandstorm” or the “Company”) holds streaming and royalty contracts on approximately 250 mining properties around the world. To aid investors and interested parties in their assessment of the Company, Sandstorm has calculated an estimation of the aggregate number of royalty ounces attributable to Sandstorm.

Methodology

Attributable royalty ounces (“Royalty Ounces”) have been prepared by estimating the proportion of Mineral Reserves and Mineral Resources that are applicable to Sandstorm’s stream and royalty interests. As with the Company’s production guidance, Royalty Ounces are converted and reported in gold equivalent ounces (“GEOs”). The following factors and assumptions have been applied to calculate Royalty Ounces:

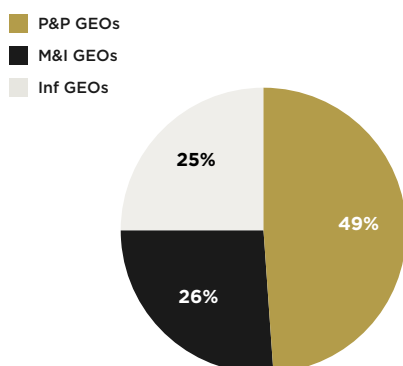

- **Land Coverage:** for streams and royalties that do not cover the entire mining concession, Sandstorm has estimated the proportion of Mineral Reserves and Mineral Resources that is applicable.
- **Non-Gold Assets:** certain streams and royalties are applicable to non-gold commodities. To convert a stream or royalty on non-gold commodities to Royalty Ounces, the following commodity prices have been assumed (USD): \$1,700/oz gold, \$23/oz silver, \$3.75/lb copper and \$110/t iron ore (Fe 62% CFR China).
- **Payable Metal:** deductions for metallurgical recovery and payability have been accounted for.
- **Net Profit Interest (NPI):** An NPI is subject to operating and capital costs specific to each project. Sandstorm has estimated an expected net profit margin for these assets then applied it to the attributable percentage of Mineral Reserves and Mineral Resources.

CAUTIONARY NOTE REGARDING ROYALTY OUNCES

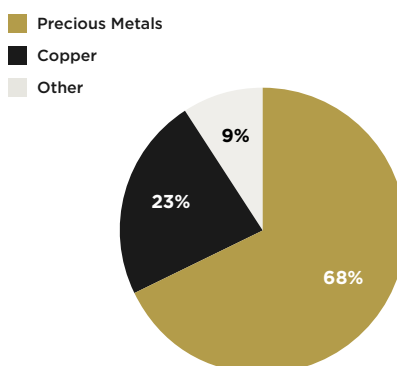

Royalty Ounces have been prepared by Sandstorm based on publicly available disclosure from individual mining operators as well as certain assumptions made by Sandstorm management. The information regarding Royalty Ounces has not been reviewed or endorsed by the operators of the projects and carries no standardized meaning in accordance with the Canadian Institute of Mining, Metallurgy and Petroleum (“CIM”) or acceptable foreign codes for the purposes of NI 43-101. Investors are cautioned in applying any reliance on the information included henceforth as no assurance can be made that the estimates and assumptions are accurate and that such Royalty Ounces will be realized.

Royalty Ounces by Category

Royalty Ounces by Metal Type

Royalty Ounces by Stage

Notes to Royalty Ounces

1 ANTAMINA

Silver Stream: Management estimates 100% of the Mineral Reserves and Mineral Resources are subject to Sandstorm's 1.66% silver stream.

NPI Royalty: Management estimates 100% of the Mineral Reserves and Mineral Resources are subject to Sandstorm's NPI and estimates an equivalent NSR royalty rate of 0.193% is applicable.

2 AURIZONA

Management estimates 100% of the Mineral Reserves and Mineral Resources are subject to our royalty interest and estimates a rate of 4% is applicable (based on a \$1,700/oz gold price).

3 BLYVOOR

Management estimates 100% of the Mineral Reserves and Mineral Resources are subject to Sandstorm's gold stream. Sandstorm's gold stream is 10% (until 16 koz delivered each year, 5% thereafter) until 300 koz are delivered; then 0.5% thereafter. Incorporating the threshold and expected annual production, management estimates a 5.7% attributable stream rate on Mineral Reserves and a 0.5% attributable stream rate on Mineral Resources.

4 BONIKRO

Management estimates 100% of the Mineral Reserves and Mineral Resources are subject to Sandstorm's gold stream. Sandstorm's gold stream is 6% until 39,000 ounces of gold have been delivered; then 3.5% until 61,750 ounces of gold delivered; then 2% thereafter. Incorporating the different thresholds, management estimates a 4.5% attributable stream rate on Mineral Reserves and a 2.3% attributable stream rate on Mineral Resources.

5 CASERONES

Management estimates 100% of the Mineral Reserves and Mineral Resources are subject to our royalty interest and estimates a rate of 0.63% is applicable (based on >\$1.25/lb copper price).

6 CERRO MORO

Management estimates 100% of the Mineral Reserves and Mineral Resources are subject to Sandstorm's silver stream. Sandstorm's silver stream is 20% (up to a maximum of 1.2 Moz of silver annually) until 7.0 million ounces are delivered; then 9% thereafter. Incorporating the threshold, management estimates a 16% attributable stream rate on Mineral Reserves and a 9% attributable stream rate on Mineral Resources.

7 CHAPADA

Management estimates 100% of the Mineral Reserves and Mineral Resources are subject to Sandstorm's copper stream. Sandstorm's copper stream is 4.2% (up to a maximum of 3.9 Moz of copper annually) until 39 million pounds are delivered; then 3% until, on a cumulative basis, 50 million pounds of copper are delivered; then 1.5% thereafter. Incorporating the different thresholds, management estimates a 2% attributable stream rate on Mineral Reserves and a 1.5% attributable stream rate on Mineral Resources.

8 FRUTA DEL NORTE

Management estimates 100% of the Mineral Reserves and Mineral Resources are subject to Sandstorm's 0.9% NSR.

9 GREENSTONE

Management estimates 100% of the Mineral Reserves and Mineral Resources are subject to Sandstorm's gold stream. Sandstorm's gold stream is 2.375% until 120,333 ounces of gold have been delivered; then 1.583% thereafter. Incorporating the different thresholds, management estimates a 2.375% attributable stream rate on Mineral Reserves and a 1.583% attributable stream rate on Mineral Resources.

10 GUALCAMAYO DCP

Management estimates 100% of the Mineral Reserves and Mineral Resources are subject to Sandstorm's 1.5% NSR.

11 HIGHLAND VALLEY

Management estimates 100% of the Mineral Reserves and Mineral Resources are subject to Sandstorm's NPI and estimates an equivalent NSR royalty rate of 0.165% is applicable.

12 HOD MADEN

Management estimates 100% of the Mineral Reserves and Mineral Resources are subject to Sandstorm's gold stream and 2% NSR. Sandstorm's gold stream is 20% until 405 koz of gold have been delivered; then 12% thereafter. Incorporating the different thresholds, management estimates a 20% attributable stream rate on Mineral Reserves and a 12% attributable stream rate on Mineral Resources.

13 HORNE 5

Management estimates 100% of the Mineral Reserves and Mineral Resources are subject to Sandstorm's 2% NSR.

14 HOUNDÉ

Management estimates approximately 75% of the Mineral Reserves and approximately 27% of the Mineral Resources are subject to Sandstorm's 2% NSR.

15 HUGO NORTH EXTENSION

Management estimates 100% of the Hugo North Extension Mineral Reserves and Mineral Resources are subject to Sandstorm's 5.62% gold stream, 5.62% silver stream and 0.42% copper stream.

16 LOBO-MARTE

Management estimates 100% of the Mineral Reserves and Mineral Resources are subject to Sandstorm's 1.05% NSR.

17 MARA

Management estimates 100% of the Mineral Reserves and Mineral Resources are subject to Sandstorm's 0.25% NSR.

18 PLATREEF

Management estimates 100% of the Mineral Reserves and Mineral Resources are subject to Sandstorm's gold stream. Sandstorm's gold stream is 37.5% until 131,250 ounces are delivered; then 30% until, on a cumulative basis, 256,980 ounces are delivered; then 1.875% thereafter. Incorporating the different thresholds, management estimates a 33.4% attributable stream rate on Mineral Reserves and a 2.0% attributable stream rate on Mineral Resources.

19 ROBERTSON

Management estimates 100% of the Mineral Reserves and Mineral Resources on the Robertson deposit are subject to our royalty interest. Our royalty rate varies between 1.0-2.25% based on the gold price.

20 VALE (NORTHERN AND SOUTHEASTERN SYSTEMS)

At the Northern System, 100% of the Mineral Resources and Mineral Reserves are estimated to be covered by the Vale Royalty. At the Southeastern System, 60% of Mineral Reserves are estimated to be covered by the Vale Royalty and due to the limited recent disclosure by Vale S.A. on Mineral Resources for the Southeastern System, only Mineral Resources covering Itabira are included in the calculation. Historically, approximately 70% of Southeastern System production has been attributable to the Vale Royalty and is expected to remain at that level over the medium-term.

21 TROILUS

Management estimates 100% of the Mineral Reserves and Mineral Resources are subject to Sandstorm's 1.0% NSR.

22 WOODLAWN

Sandstorm's silver stream is 80% of the silver, which is capped at AUD\$27 million. Based on an estimated silver price of \$23/ounce, management estimates a 21.6% attributable stream rate on Mineral Resources.

Mineral Reserves & Mineral Resources

Mineral Reserves and Resources are based on publicly disclosed information as of December 15, 2023. Sandstorm has chosen a selection of assets to include in this table (shown on a 100% basis, unless stated otherwise in the notes).

Notes to Mineral Reserves & Mineral Resources

QUALIFIED PERSONS

Keith Laskowski (MSc), Sandstorm's Vice President, Technical Services is a Qualified Professional (#01221QP) of the Mining and Metallurgical Society of America and a Qualified Person as defined by Canadian National Instrument 43-101. He has reviewed and approved the technical information in the Mineral Reserves and Mineral Resource section of this document.

Imola Götz (M.Sc., P.Eng.), Sandstorm's Vice President, Mining & Engineering is a Qualified Person as defined by Canadian National Instrument 43-101. She has reviewed and approved the scientific and technical information in the Mineral Reserves and Mineral Resources section of this document.

- ↗ *All Mineral Reserves and Resources have been calculated in accordance with CIM or acceptable foreign codes for the purposes of NI 43-101.*
- ↗ *Rows may not sum due to rounding.*
- ↗ *Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability.*
- ↗ *Sandstorm's stream or royalty interests may not cover the entire property and/or may not cover all estimated Mineral Reserves and Resources.*
- ↗ *Only the metals that Sandstorm has a stream or royalty interest in are included in the table. For full Mineral Reserves and Mineral Resources, please refer to the source documents listed below.*
- ↗ *The effective date of the individual Mineral Reserve and Mineral Resource statements vary by asset and are provided in the following asset specific notes.*
- ↗ *All figures are in U.S. Dollars unless otherwise noted.*

¹ ANTAMINA

Glenore plc; Mineral Reserves and Resources Report, December 31, 2022

Mineral Reserve & Mineral Resource (inclusive of Mineral Reserves):
Cut-off grades and commodity price assumptions not available
Effective date — December 31, 2022

Glenore does not disclose contained metal, it has been calculated using the reported tonnages and grades.

² AURIZONA

Equinox Gold Corp.; News Release, September 20, 2021

Mineral Reserve:
Cut-off grades (open pit) — varies from 0.35 g/t to 0.47 g/t Au
Cut-off grades (underground) — 1.80 g/t
Commodity price assumptions — \$1,350/oz Au
Effective date — June 30, 2021

Mineral Resource (exclusive of Mineral Reserves):
Cut-off grades (open pit) — 0.30 g/t Au
Cut-off grades (underground) — 1.00 g/t Au
Commodity price assumptions not available
Effective date — June 30, 2021

³ BLYVOOR

Blyvoor Gold Capital (Pty) Ltd; NI 43-101 Technical Report on the Blyvoor Gold Mine, March 1, 2021

Mineral Reserve:
Cut-off grades — 479 cm.g/t Au
Commodity price assumptions — \$1,535/oz Au
Effective date — March 1, 2021

Mineral Resource (inclusive of Mineral Reserves):
Cut-off grades — 300 cm.g/t Au
Commodity price assumptions — \$1,500/oz Au
Effective date — March 1, 2021

⁴ BONIKRO

Allied Gold Corp Limited; NI 43-101 Technical Report for the Bonikro Gold Project, July 5, 2023

Mineral Reserve:
Cut-off grades varies by ore type — 0.60–0.85 g/t Au
Commodity price assumptions — \$1500/oz Au
Effective date — December 31, 2022

Mineral Resource (inclusive of Mineral Reserves):
Cut-off grades — 0.5 g/t Au
Commodity price assumptions — \$1,800/oz Au
Effective date — December 31, 2022

⁵ CASERONES

Lundin Mining Corp; NI 43-101 Technical Report on the Caserones Mining Operation, December 31, 2022

Mineral Reserve & Mineral Resource (inclusive of Mineral Reserves):
Commodity price assumptions — \$3.65/lb Cu, \$11.45/lb Mo
Mineral Reserve cut-off grade — varies
Mineral Resource cut-off grade (open pit) — 0.13% Cu
Effective date — December 31, 2022

6 CERRO MORO

Yamana Gold Inc.; Annual Information Form for the Financial Year Ended December 31, 2022, March 29, 2023

Mineral Reserve:

Cut-off grades (open pit) — \$124.72/t NSR
 Cut-off grades (underground) — \$210.71/t NSR
 Commodity price assumptions — \$18/oz Ag
 Effective date — December 31, 2022

Mineral Resource (exclusive of Mineral Reserves):

Cut-off grades (open pit) — \$93.54/t NSR
 Cut-off grades (underground) — \$158.04/t NSR
 Commodity price assumptions — \$18/oz Ag
 Effective date — December 31, 2022

7 CHAPADA

Yamana Gold Inc.; Annual Information Form for the Financial Year Ended December 31, 2022, March 29, 2023

Mineral Reserve:

Cut-off grades (open pit) — \$4.72/t NSR
 Commodity price assumptions — \$3.35/lb Cu
 Effective date — December 31, 2022

Mineral Resource (inclusive of Mineral Reserves):

Cut-off grades — \$4.72/t NSR
 Commodity price assumptions — \$4.02/lb Cu
 Effective date — December 31, 2022

8 FRUTA DEL NORTE

Lundin Gold Inc.; NI 43-101 Technical Report Fruta del Norte Mine, December 31, 2022

Mineral Reserve:

Cut-off grades — 4.19 g/t Au (longhole stopes), 5.0 g/t Au (Drift and Fill)
 Commodity price assumptions — \$1,400/oz Au, \$19/oz Ag
 Effective date — December 31, 2022

Mineral Resource (inclusive of Mineral Reserves):

Cut-off grades — 3.4 g/t Au
 Commodity price assumptions — \$1,600/oz Au
 Effective date — December 31, 2022

9 GREENSTONE

Premier Gold Mines Limited; NI 43-101 Technical Report Hardrock Project, December 16, 2020

Mineral Reserve:

Cut-off grades — 0.35 g/t Au
 Commodity price assumptions — \$1,250/oz Au
 Effective date — August 8, 2019

Mineral Resource (exclusive of Mineral Reserves)

Cut-off grades (open pit) — 0.3 g/t Au
 Cut-off grades (underground) — 2.00 g/t Au
 Commodity price assumptions (open pit) — \$1,250/oz Au
 Commodity price assumptions (underground) — C\$1,715/oz Au
 Effective date — April 9, 2019

10 GUALCAMAYO DCP

Mineros S.A.; Annual Information Form For the fiscal year ended December 31, 2022, March 30, 2023

Mineral Resource:

Cut-off grades — 1.51 g/t Au (Santigao), 2.02 g/t Au (Feeder), n/a (Rodado)
 Commodity price assumptions — \$1,700/oz Au
 Effective date — December 31, 2022

11 HIGHLAND VALLEY

Teck Resources Limited; 2022 Annual Information Form, February 21, 2023

Mineral Reserve & Mineral Resource (exclusive of Mineral Reserves):

Cut-off grades — \$5.33/t NSR
 Commodity price assumptions — \$3.15/lb Cu, \$9.90/lb Mo
 Effective date — December 31, 2022

Teck does not disclose contained metal, it has been calculated using the reported tonnages and grades.

12 HOD MADEN

Royalty North Partners Limited; NI 43-101 Technical Report Hod Maden Project, February 28, 2021

Mineral Reserve:

Cut-off grades — \$82/t NSR
 Commodity price assumptions — \$1,300/oz Au, \$3.00/lb Cu
 Effective date — July 31, 2020

Mineral Resource (inclusive of Mineral Reserves):

Cut-off grades — \$63/t NSR
 Commodity price assumptions — \$1,300/oz Au, \$3.00/lb Cu
 Effective date — July 27, 2019

13 HORNE 5

Falco Resources; NI 43-101 Technical Report Horne 5 Gold Project, March 18, 2021

Mineral Reserve:

Cut-off grades — \$55/t
 Commodity price assumptions — \$1,300/oz Au, \$18.50/oz Ag, \$2.15/lb Cu, \$1.00/lb Zn
 Effective date — August 26, 2017

Falco does not disclose contained metal, it has been calculated using the reported tonnages and grades.

Mineral Resource (inclusive of Mineral Reserves):

Cut-off grades — \$55/t
 Commodity price assumptions — \$1,550/oz Au, \$20/oz Ag, \$3.00/lb Cu, \$1.15/lb Zn
 Effective date — February 24, 2021

14 HOUNDÉ

Endeavour Mining; Annual Report 2022, March 9, 2023

Mineral Reserve:

Cut-off grades — varies 0.50–0.70 g/t Au
 Commodity price assumptions — \$1,300/oz Au
 Effective date — December 31, 2021

Mineral Resource (inclusive of Mineral Reserves):

Cut-off grades — 0.50 g/t Au
 Commodity price assumptions — \$1,500/oz Au, exception Golden Hill deposit @ \$1,800/oz Au
 Effective date — December 31, 2021

**15 HUGO NORTH EXTENSION**

Entrée Resources; NI 43-101 Technical Report Entrée/Oyu Tolgoi Joint Venture Project, October 8, 2021

Mineral Reserve:

Cut-off grades — \$17.84/t NSR

Commodity price assumptions — \$3.08/lb Cu, \$1,292/oz Au, \$19.00/oz Ag

Effective date — May 15, 2021

Mineral Resource (inclusive of Mineral Reserves):

Cut-off grades — 0.41% CuEq

Commodity price assumptions — \$3.08/lb Cu, \$1,292/oz Au, \$19/oz Ag

Effective date — March 31, 2021

16 LOBO-MARTE

Kinross Gold Corporation; News Release, November 10, 2021

Mineral Reserve & Mineral Resource (exclusive of Mineral Reserves):

Cut-off grades — not available

Mineral Reserve Commodity price assumptions — \$1,200/oz Au

Mineral Resource Commodity price assumptions — \$1,600/oz Au

Effective date — December 31, 2022

17 MARA

Yamana Gold Inc.; Press Release, July 19, 2019

Mineral Reserve & Mineral Resource (exclusive of Mineral Reserves):

Cut-off grades — \$8.42/t NSE

Mineral Reserve Commodity price assumptions — \$1,250 Au, \$18.00/oz Ag,

\$3.00/lb Cu, \$11.00/lb Mo

Mineral Resource Commodity price assumptions — \$1,600/oz Au, \$24/oz Ag,

\$4.00/lb Cu, \$11.00/lb Mo

Effective date — June 30, 2019

18 NORTHERN SYSTEM (SERRA LESTE, SERRA NORTE, SERRA SUL)

Vale S.A.; Form 20-F as filed with the Securities and Exchange Commission on April 12, 2023

Mineral Reserve & Mineral Resource (exclusive of Mineral Reserves):

Cut-off grades — not available

Mineral Reserve commodity price assumptions — \$74.5/dmt for 62% Fe grade

Mineral Resource commodity price assumptions — \$90/dmt for 62% Fe grade

Effective date — December 31, 2022

19 PLATREEF

Invanhoe Mines Ltd.; NI 43-101 Technical Report Platreef 2022 Feasibility Study, February 28, 2022

Mineral Reserve & Mineral Resource (inclusive of Mineral Reserves):

Mineral Reserve cut-off grades — \$155/t–\$80/t NSR

Mineral Resource cut-off grades — 2 g/t 3PE+Au

Commodity price assumptions — \$1,300/oz Au, \$1,600/oz Pt, \$815/oz Pd, \$1,500/oz Rh

Effective date — January 26, 2022

20 ROBERTSON

Barrick Gold Corporation; Investor Presentation: Results for Q4 and Full Year 2022, February 15, 2023

Barrick Gold Corporation; Annual Report 2022, March 17, 2023

Mineral Reserve & Mineral Resource (inclusive of Mineral Reserves):

Cut-off grades — varied

Mineral Reserve commodity price assumptions — \$1,300/oz Au

Mineral Resource commodity price assumptions — \$1,700/oz Au

Effective date — December 31, 2022

21 SOUTHEASTERN SYSTEM (ITABIRA, MARIANA, MINAS CENTRAIS)

Vale S.A.; Form 20-F as filed with the Securities and Exchange Commission on April 12, 2023

Mineral Reserve & Mineral Resource (exclusive of Mineral Reserves):

Cut-off grades — not available

Mineral Reserve commodity price assumptions — \$74.5/dmt for 62% Fe grade

Mineral Resource commodity price assumptions — \$90/dmt for 62% Fe grade

Effective date — December 31, 2022

Minas Centrais figures are shown on a 98.6% basis.

22 TROILUS

Troilus Gold Corp.; News Release, October 16, 2023

Mineral Resource:

Cut-off grades (open pit) — 0.3 g/t AuEq

Cut-off grades (underground) — 0.9 g/t AuEq

Commodity price assumptions — \$1,850/oz Au, \$4.25/lb Cu, \$23/oz Ag

Effective date — October 2, 2023

23 WOODLAWN

Develop Global Limited; ASX Announcement, March 8, 2022

Mineral Resource:

Cut-off grades (open pit) — A\$100/t NSR, and A\$140/t NSR for remnant lenses

Commodity price assumptions — \$22.8/oz Ag

Effective date — August 2, 2022

Develop Global does not disclose contained metal, it has been calculated using the reported tonnages and grades.

UNCERTAINTY OF MINERAL RESOURCE AND MINERAL RESERVE ESTIMATES

The figures for Mineral Resources and Mineral Reserves presented in this document are estimates only and no assurance can be given that the estimated Mineral Reserves and Mineral Resources will be recovered or that they will be recovered at the rates estimated. Mineral Reserve and Mineral Resource estimates are based on limited sampling and geological interpretation, and, consequently, are uncertain because the samples may not be representative. Mineral Reserve and Mineral Resource estimates may require revision (either up or down) based on actual production experience. Market fluctuations in the price of metals, as well as increased production costs or reduced recovery rates, may render certain Mineral Reserves and Mineral Resources uneconomic and may ultimately result in a restatement of estimated Mineral Reserves and/or Mineral Resources. For example, operators of the projects may base their estimates of Mineral Reserves and/or Mineral Resources on commodity prices that may be higher than spot prices. The economic viability of a mineral deposit may also be impacted by other attributes of a particular deposit, including, but not limited to, size, grade and proximity to infrastructure, government regulations and policy relating to price, taxes, duties, land tenure, land use permitting, the import and export of minerals and environmental protection, by political and economic stability and by a social license to operate in a particular jurisdiction. Any of these factors may require operators of the projects to reduce their Mineral Reserves and/or Mineral Resources, which may result in a material and adverse effect on the Company's profitability, results of operations, financial condition and the trading price of the company's securities.

CAUTIONARY STATEMENTS TO U.S. SECURITY HOLDERS

The disclosure and information contained or referenced herein uses mineral reserve and mineral resource classification terms that comply with reporting standards in Canada, and mineral reserve and mineral resource estimates are made in accordance with Canadian NI 43-101 and the Canadian Institute of Mining, Metallurgy and Petroleum — CIM Definition Standards on Mineral Resources and Mineral Reserves, adopted by the CIM Council, as amended (the "CIM Definition Standards"). These standards differ significantly from the mineral reserve disclosure requirements of the United States Securities Exchange Commission (the "SEC") set forth in Industry Guide 7. Consequently, information regarding mineralization contained or referenced herein is not comparable to similar information that would generally be disclosed by U.S. companies under Industry Guide 7 in accordance with the rules of the SEC. Further, the SEC has adopted amendments to its disclosure rules to modernize the mineral property disclosure requirements for issuers whose securities are registered with the SEC under the Securities Exchange Act of 1934 ("Exchange Act"). These amendments became effective February 25, 2019 (the "SEC Modernization Rules") and, commencing for registrants with their first fiscal year beginning on or after January 1, 2021, the SEC Modernization Rules replaced the historical property disclosure requirements included in SEC Industry Guide 7. As a foreign private issuer that files its annual report on Form 40-F with the SEC pursuant to the multi-jurisdictional disclosure system, the Company is not required to provide disclosure on its mineral properties under the SEC Modernization Rules and will continue to provide disclosure under NI 43-101 and the CIM Definition Standards. The SEC Modernization Rules include the adoption of terms describing mineral reserves and mineral resources that are "substantially similar" to the corresponding terms under the CIM Definition, but there are differences in the definitions under the SEC Modernization Rules and the CIM Definition Standards. Accordingly, there is no assurance any mineral reserves or mineral resources that the Company may report as "proven mineral reserves", "probable mineral reserves", "measured mineral resources", "indicated mineral resources" and "inferred mineral resources" under NI 43-101 would be the same had the Company prepared the mineral reserve or mineral resource estimates under the standards adopted under the SEC Modernization Rules. U.S. investors are also cautioned that while the SEC recognizes "measured mineral resources", "indicated mineral resources" and "inferred mineral resources" under the Modernization Rules, investors should not assume that any part or all of the mineralization in these categories will ever be converted into a higher category of mineral resources or into mineral reserves. Mineralization described using these terms has a greater amount of uncertainty as to its existence and feasibility than mineralization that has been characterized as reserves. Accordingly, investors are cautioned not to assume that any measured mineral resources, indicated mineral resources, or inferred mineral

resources that the Company reports are or will be economically or legally mineable. Further, “inferred mineral resources” have a greater amount of uncertainty as to their existence and as to whether they can be mined legally or economically. Therefore, U.S. investors are also cautioned not to assume that all or any part of the “inferred mineral resources” exist. Under Canadian securities laws, estimates of “inferred mineral resources” may not form the basis of feasibility or pre-feasibility studies, except in rare cases. For the above reasons, information contained or referenced herein regarding descriptions of our mineral reserve and mineral resource estimates is not comparable to similar information made public by U.S. companies subject to reporting and disclosure requirements of the SEC under either Industry Guide 7 or SEC Modernization Rules.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING INFORMATION

This document contains “forward-looking statements”, within the meaning of the U.S. Securities Act of 1933, the U.S. Securities Exchange Act of 1934, the Private Securities Litigation Reform Act of 1995 and applicable Canadian securities legislation, concerning the business, operations and financial performance and condition of Sandstorm. Forward-looking statements include, but are not limited to, the future price of gold, silver, copper, iron ore and other metals, the estimation of mineral reserves and resources, realization of mineral reserve estimates, and the timing and amount of estimated future production. Forward-looking statements can generally be identified by the use of forward-looking terminology such as “may”, “will”, “expect”, “intend”, “estimate”, “anticipate”, “believe”, “continue”, “plans”, or similar terminology. Forward-looking statements are made based upon certain assumptions and other important factors that, if untrue, could cause the actual results, performances or achievements of Sandstorm to be materially different from future results, performances or achievements expressed or implied by such statements. Such statements and information are based on numerous assumptions regarding present and future business strategies and the environment in which Sandstorm will operate in the future, including the price of gold and anticipated costs. Certain important factors that could cause actual results, performances or achievements to differ materially from those in the forward-looking statements include, amongst others, changes in business plans and strategies, market conditions, share price, best use of available cash, gold and other commodity price volatility, discrepancies between actual and estimated production, mineral reserves and resources and metallurgical recoveries, mining operational and development risks relating to the parties which produce the gold Sandstorm will purchase, regulatory restrictions, activities by governmental authorities (including changes in taxation), currency fluctuations, the global economic climate, dilution, share price volatility and competition. Forward-looking statements are subject to known and unknown risks, uncertainties and other important factors that may cause the actual results, level of activity, performance or achievements of Sandstorm to be materially different from those expressed or implied by such forward-looking statements, including but not limited to: the impact of general business and economic conditions, the absence of control over mining operations from which Sandstorm will purchase gold, other commodities or receive royalties from, and risks related to those mining operations, including risks related to international operations, government and environmental regulation, actual results of current exploration activities, conclusions of economic evaluations and changes in project parameters as plans continue to be refined, risks in the marketability of minerals, fluctuations in the price of gold and other commodities, fluctuation in foreign exchange rates and interest rates, stock market volatility, as well as those factors discussed in the section entitled “Risks to Sandstorm” in Sandstorm’s annual report for the financial year ended December 31, 2022 and the section entitled “Risk Factors” contained in the Company’s annual information form dated March 26, 2023 available at www.sedarplus.ca and most recent annual report filed on Form 40-F with the SEC on www.sec.gov. Although Sandstorm has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. Sandstorm does not undertake to update any forward-looking statements that are contained or incorporated by reference, except in accordance with applicable securities laws.

2024 ROYALTY OUNCES AND RESERVES & RESOURCES
